I. Title: Field effect  
I. Hayashi, T.

Trans. of [Denki Tsushin Gakkai Zasshi] (Japan) 1960,  
v. 43, no. 3, p. 298-305.

DESCRIPTORS: \*Transistors, Ultrasonic radiation,  
Theory, Design.

This article proposes a new type of easy-to-make field effect transistor, and describes its structure, theory of design, method of production, the basic characteristics of a trial model, its advantages and uses. The structure of this type is characterized in that grooves are set very close to the junction part in the P or N layer of a growth-type PN junction, thus forming thin layers between the other layers. These are the channels of the field effect transistor. In addition, the re-
